Control and Registration Manager

---

Deliverability Control and  
Registration Manager Description :  
Deliverability Control and  
Registration Manager is a mail  
submission manager for dynamic  
lists and mailing lists. With this  
dynamic list manager, you can  
generate dynamic mailing lists based  
on a predefined list template, such as  
a recipient list or a vacation list, or  
based on a combination of a  
recipient list and a date. You can  
even set how the delivery of the list  
is done, such as sending to recipients  
once or a certain number of times.

What's New In NeTools?

In addition to being a “Shiny Little”  
setup GUI, NeTools also includes a  
Live-Status Display of Network  
Traffic, that lets you monitor all the  
traffic going through your network.  
View all the IP address of the

---

systems connected to your network, as well as the ARP-spoofing IP addresses. And what's more, NeTools has a built-in "Remote-Monitor" feature that lets you monitor, manage and even "DDOS" ("Denial of Service") your network without being physically present in it. NeTools also has an "Intrusion-Detection" and "NIDS (Network Intrusion Detection System)", that will alert you if any suspicious activity is detected on your network. Besides these, it has a built-in "Bridge" feature that allows you to bridge your network connection to

---

that of another machine, so that you can monitor it. As a beginner, you'll find that NeTools comes with all the tools you'll ever need to use in your day-to-day tasks in a cool GUI. For advanced users, it comes with a few extra "tools" too, like "WinPcap", "TCPView", "Wireshark" etc. "Free, Open Source Network Monitoring System" is how many people classify NeTools and there are many reasons as to why this should be the case. The first reason being that it's free and the second reason is because it's Open Source. But in this article, we're not going to elaborate on that.

---

We'll rather focus on the GUI and features of NeTools. NeTools Highlights: There are many NeTools highlights to it. One of the major ones is the fact that it's open source. You can check the source code of NeTools at: This way, you'll be able to have a look at all the features that NeTools has to offer, the drawbacks and as well as the features of other networking tools out there. NeTools Features: As for it's features, NeTools has them all, from the basics to the more advance ones. The basics include such a tool as "Live-Status Display" and "IP View". Live-

---

Status Display will show you the IP address of all the devices connected to your network, as well as the MAC addresses of the devices. IP View will show you all the IP addresses that belong to your network as well as the MAC addresses of the devices. Once you've got these basics, you can proceed to “Network Intrusion Detection System”

---

**System Requirements:**

Windows XP, Vista, 7, 8, or 10  
Quake 4 (1.1.3) or 1.4.5 or Latest
