
PtouchLabel Crack X64

This plugin provides a way to print barcode and thumbnail images to labels for use on DVD cases or other packaging. This plugin does not attempt to modify the print job or create other output based on the user selections. In other words, the user does not need to manually create a print job before using this plugin. This plugin uses the Ptouch Editor so you must have PtouchEditor 3.0 or 3.1 installed in order to use the plugin. The plugin will not work if PtouchEditor is not installed. Images printed by this plugin are resized to fit a box of the specified size. The field types

can be specified when creating the print job. The maximum allowed field types is four. Each of these fields has a set of allowed values. The allowed value can be specified when creating the print job. If the allowed value is not specified, a default will be used. The field options available are as follows:

Value	Description
Barcode O-ratio,	Transparent Background Thumb Non-EAN or UPCA style. You can use this without creating a barcode.
Title	Use this field to set the title of the label. It does not affect the DVD content.
Rating	Set the rating for the label. This does not affect the DVD content.
Collection	An identification label for cases of the same

title. The value defaults to the title of the title of the DVD. Collection Number If a collection number is specified, a barcode will be placed next to this number.

Objects The objects that you wish to appear in the label. Each Object type must be provided a value. Text All text is printed in the text field. CDs The CD box field is used for placing a barcode to indicate the CD number. This is a two byte value. You can use this without creating a barcode. CDTitle A text field that is used to set the name of the CD. CDATherentry The title of the CD. This is an optional field. If you do not use this field, a default label will be automatically generated. CDNumber A

text field that is used to set the number of the CD. CWOR A text field that is used to set a year of the release date of the content. CurTherenty A text field that is used to set a number of the type of the content, such as drama, TV show, CD, etc. The user can

PtouchLabel Keygen Full Version X64

Allows you to create and print labels containing text, image or barcode objects. What's New in PtouchLabels 3.0.0: bPAC label support! bPAC support including title, barcode, image and text objects bPAC compatible printer support including plain paper, envelope and continuous paper output

including title, barcode 09e8f5149f

PtouchLabel is a plugin for the OCR label application of DVD Profiler. PtouchLabel will take the text of a label and convert it to a barcode image that is compatible with the following barcode formats: EAN, UPC, JAN, Europ and Aztec. PtouchLabel is a plug-in for Windows XP and Vista. It is free and you do not need to install anything on your computer. The PtouchLabel plug-in works with Windows XP and Vista operating systems. The PtouchLabel Plugin converts text into valid and reliable barcodes as follows: Text file into a text object Text object into a label

Text object into an image Text file into
text Text object into barcode Text file
into text (default) Text file into label
Text file into image PtouchLabel

Requirements: You must have Ptouch
Image Pro installed and it must be set to
use a bPAC compatible printer. If you
do not have a compatible printer, you
will need to add a compatible printer to
PtouchImage Pro. You must install a
print driver that is compatible with the
printer that you use in order to print
labels. For the Windows XP operating
system, a Brother Windows Print Device
Driver version 3.1 (or higher) will
provide high quality labels. You may use
the following print settings:

Recomended: PRINT SETTINGS

DocLable Text: This is the text that is displayed as the user is typing. There is no limit to the characters you can use as long as they are within the printable area of the label. **Barcode Type:** This is the barcode type that the plug-in will use. There are four main barcode types that are supported: EAN, UPC, JAN and Europ. If no other type of barcode is found that is compatible with the selected barcode format, the plug-in will go to the default barcode image. **Original Barcode:** Set this if you want the plug-in to use the barcode image that was originally printed on the DVD. You must have created a barcode object from the

original print job. Yourbarcode: Set this if you want the plug-in to use the barcode image that was created during the label job. This barcode type allows you to get the barcode image into the system before

What's New In PtouchLabel?

PtouchLabel is a plugin used by PTLLabelInstall.exe to build customized DVD label. The plugins use certain fields from the Profiler. Exact spelling must be used. In most cases, these are the only required fields to place on the label. Supported fields: Title: Title of the DVD Genre: Genre of the DVD Rating: Rating of the DVD Release Date:

Release date of the DVD [barcode]
[upca] [icon] Text Field: Text
[Templates: Use the following templates
provided by the Brother program]
barcode image (4kb) upca.bmp (3kb)
icon.bmp (4kb) Additional Text Fields:
The following fields are also supported
in some situations. Full Text Fields: The
full list of supported fields is: Title: Title
of the DVD Genre: Genre of the DVD
Rating: Rating of the DVD Release
Date: Release date of the DVD
[barcode] [upca] [icon] Text: Text of the
label Text Field: Text Icon: Bitmap
containing image Image: Bitmap
containing image Font: The font used for
the text and image. Available fonts

include: {binary_1} {binary_2}
{binary_3} {binary_4} {binary_5}
{binary_6} {barcode} {upca} {icon}

Text Font: Text font to use for text,
bitmap font for images. Text Size: Size
of text. Text size for fonts may be
specified in 1/10ths of a point. Text
Style: Text style (bold, italic, etc.). Text
style for fonts may be specified in
1/10ths of a point. Text Color: Text
color for text. Text color for fonts may
be specified in 1/10ths of a point. Text
Extent: Number of points of text that
will be drawn. 0 = no limit. Text Height:
Height of text. 0 = no limit. Image Font:
Font used for image. Image Size: Size of
the image. 0 = no limit. Image Extent:

Number of points of the image that will
be drawn. 0 = no limit. Image Height:
Height of the image. 0 = no limit. Image
Orientation

System Requirements:

Minimum: OS: Windows 7, Windows 8
Processor: Intel Pentium 4 (3.2GHz) or better
Memory: 1 GB
DirectX: 9.0
Graphics: 32MB Video RAM
Hard Drive: 10MB available space
Other Requirements: Ableton Live 8.0 (also available from Ableton)
Ableton Live Suite 8.0 (also available from Ableton)
The SoundFont from the target file (also available from the SoundFont folder)
Sound
