If your computer has been acting up lately, chances are it is infected with spyware, adware, or other malware. But don't give up yet! PC-Clean is an award-winning anti-spyware and adware removal tool that can not only detect and remove adware, but also help you get rid of system issues, like slow PC performance, and even clean your computer of unnecessary files. PC-Clean is a program that can help you get rid of unwanted files from your hard drive and ultimately improve the performance of your computer. Surprise-free installation and plain GUI The setup process is a piece of cake as it does not last long and does not come with any offers from third-parties. The interface consists of a plain and simple window packed with a few tabs which grant you quick access to all the available features, and a few buttons. Although no Help contents are featured, the app remains quite easy to use for both beginners and well-versed individuals. Scan your hard drive and fix problems This program enables you to scan the contents of your hard drive in search for ad-ware and hacking tools, yet a small setback is that you cannot customize the directories in which to look. However, the results are displayed quite fast in the main window, and it is possible for you to select only some and remove them with just a click of the button. Although no Help contents are featured, the app remains quite easy to use for both beginners and well-versed individuals. Block ActiveX spyware and clean cookies One of the following tabs contains an app developed specifically to help you block any spyware and programs distributed by ActiveX, as well as add new ones, edit or delete them. In addition to that, it is possible to clean cookies, temporary Internet files, opened pages list, auto-complete form and password lists, URLs entered in the address bar, Windows Media Player playlist, Recycle Bin and recent documents. View running processes and manage startup items You can detect and remove any unnecessary Windows registry entries, view processes which are currently running and end them, as well as manage plugins for Browser Helper Objects and the installed toolbars. Conclusion and performance The program uses a very low quantity of system resources and manages to complete a scanning and cleaning task in a reasonable amount of time. However, you should know this item has been discontinued and therefore, you might encounter some issues. For
