## AS 2 Valuation of Inventories

16. The closing stock of finished goods (at cost) of a company amounted to ₹ $4,50,000$. The following items were included at cost in the total:
(a) 100 coats, which had cost ₹ 2,200 each and normally sold for ₹ 4,000 each. Owing to a defect in manufacture their NRV was determined at $50 \%$ of their normal selling price.
(b) Shirts which had cost ₹ 50,000 , their net realizable value at Balance sheet date was ₹ 55,000 . Commission @ $10 \%$ on sales is payable to agents.
What should the inventory value be according to AS 2 after considering the above items?

## AS 10 Property, Plant and Equipment

17. RS Ltd. has acquired a heavy plant at a cost of $₹ 2,00,00,000$. The estimated useful life is 10 years. At the end of the 2nd year, one of the major components i.e. the Boiler has become obsolete (which was acquired at price of ₹ $50,00,000$ ) and requires replacement, as further maintenance is uneconomical. The remainder of the plant is perfect and is expected to last for next 8 years. The cost of a new boiler is ₹ $60,00,000$.
Can the cost of the new boiler be recognised as an asset, and, if so, what should be the carrying value of the plant at the end of second year?

## AS 11 The Effects of Changes in Foreign Exchange Rates

18. A company had imported raw materials worth US Dollars $6,00,000$ on $5^{\text {th }}$ January, 2022, when the exchange rate was ₹ 43 per US Dollar. The company had recorded the transaction in the books at the above mentioned rate. The payment for the import transaction was made on $5^{\text {th }}$ April, 2022 when the exchange rate was ₹ 47 per US Dollar. However, on 31 st March, 2022, the rate of exchange was ₹ 48 per US Dollar. The company passed an entry on $31^{\text {st }}$ March, 2022 adjusting the cost of raw materials consumed for the difference between ₹ 47 and ₹ 43 per US Dollar.
In the background of the relevant accounting standard, is the company's accounting treatment correct? Discuss.

## AS 12 Accounting for Government Grants

19. (a) Samrat Limited has set up its business in a designated backward area which entitles the company for subsidy of $25 \%$ of the total investment from Government of India. The company has invested ₹ 80 crores in the eligible investments. The company is eligible for the subsidy and has received ₹ 20 crores from the government in February 2022. The company wants to recognize the said subsidy as its income to improve the bottom line of the company.
Do you approve the action of the company in accordance with the Accounting Standard?

## AS 13 Accounting for Investments

(b) Mother Mart Ltd., wants to re-classify its investment in accordance with AS 13. Decide the treatment to be given in each of the following cases assuming that the market value has been determined in an arm's length transaction between knowledgeable and willing buyer and seller:
(i) A portion of current investments purchased for ₹ 25 lakhs to be reclassified as long-term investments, as the company has decided to retain them. The market value as on the date of balance sheet was ₹ 30 lakhs. The fair value of the investments on the date of transfer is same as the market value on the balance sheet date
(ii) Another portion of current investments purchased for ₹ 20 lakhs has to be reclassified as long-term investments. The Fair value of these investments as on the date of the balance sheet was ₹ 12.5 lakhs.
(iii) One portion of long-term investments, no longer considered for holding purposes, to be reclassified as current investments. The original cost of these was ₹ 15 lakhs, but had been written down to ₹ 11 lakhs to recognize permanent decline as per AS 13.

## AS 16 Borrowing Costs

Thus, pre-incorporation profits is ₹ 41,000 and post- incorporation profit is ₹ $1,43,000$.

## Working Notes:

1. Sales ratio

|  | $(₹)$ |
| :--- | ---: |
| Sales for the whole year | $24,00,000$ |
| Sales up to 31 ${ }^{\text {st }}$ July, 2021 | $\underline{6,00,000}$ |
| Therefore, sales for the period from 1 ${ }^{\text {st }}$ August, 2021 to 31 ${ }^{\text {st }}$ March, | $\underline{18,00,000}$ |
| 2022 |  |

Thus, sale ratio $\quad=600: 1800=1: 3$
2. Time ratio
$1^{\text {st }}$ April, 2021 to $31^{\text {st }}$ July, 2021 : $1^{\text {st }}$ August, 2021 to $31^{\text {st }}$ March, 2022
$=4$ months: 8 months $=1: 2$, Thus, time ratio is 1:2.

18. As per AS 11 (revised 2003), 'The Effects of Changes in Foreign Exchange Rates', monetary items denominated in a foreign currency should be reported using the closing rate at each balance sheet date. The effect of exchange difference should be taken into profit and loss account. Trade payables is a monetary item, hence should be valued at the closing rate i.e, ₹ 48 at $31^{\text {st }}$ March, 2022 irrespective of the payment for the same subsequently at lower rate in the next financial year. The difference of ₹ 5 (₹ 48 -₹ 43 ) per US dollar should be shown as an exchange loss in the profit and loss account for the year ended 31 st March, 2022 and is not to be adjusted against the cost of raw materials. In the subsequent year, the company would record an exchange gain of ₹ 1 per US dollar, i.e., the difference between ₹ 48 and ₹ 47 per US dollar. Hence, the accounting treatment adopted by the company is incorrect.
19. (a) As per AS 12 "Accounting for Government Grants", where the government grants are in the nature of promoters' contribution, i.e., they are given with reference to the total investment in an undertaking or by way of contribution towards its total capital outlay (for example, Central Investment Subsidy Scheme) and no repayment is ordinarily expected in respect thereof, the grants are treated as capital reserve which can be neither distributed as dividend nor considered as deferred income.

The subsidy received by Samrat Ltd. for setting up its business in a designated backward area will be treated as grant by the government in the nature of promoter's contribution as the grant is given with reference to the total investment in an undertaking i.e. subsidy is $25 \%$ of the eligible investment and also no repayment is apparently expected in respect thereof.
Since the subsidy received is neither in relation to specific fixed assets nor in relation to revenue. Thus, the company cannot recognize the said subsidy as income in its financial statements in the given case. It should be recognized as capital reserve which can be neither distributed as dividend nor considered as deferred income.
(b) As per AS 13 'Accounting for Investments', where investments are reclassified from current to long-term, transfers are made at the lower of cost and fair value at the date of transfer. When long-term investments are re-classified as current investments, transfers are made at the lower of cost and carrying amount at the date of transfer.
(i) In the first case, the market value of the investments is ₹ 30 lakhs, which is higher than its cost i.e. ₹ 25 lakhs. Therefore, the transfer to long term investments should be made at cost i.e. ₹ 25 lakhs
(ii) In the second case, the market value of the investment is ₹ 12.5 lakhs, which is lower than its cost i.e. ₹ 20 lakhs. Therefore, the transfer to long term investments should be made in the books at the market value i.e. ₹ 12.5 lakhs. The loss of ₹ 7.50 lakhs $(20-12.5)$ should be charged to Profit and Loss statement.
(iii) In the third case, the book value of the investments is ₹ 11 lakhs, which is lower than its cost, i.e. ₹ 15 lakhs. As the transfer should be at carrying amount, hence this re-classified current investment should be carried at ₹ 11 lakhs.

## Accounting treatment:

## 1. For Phase I and Phase II

Since Phase I and Phase II have become operational at the mid of the year, half of the interest amount of ₹ $6,65,158.50$ (i.e. ₹ $13,30,317 / 2$ ) relating to Phase I and Phase II should be capitalized (in the ratio of asset costs $34: 64$ ) and added to respective assets in Phase I and Phase II and remaining half of the interest amount of ₹ $6,65,158.50$ (i.e. ₹ $13,30,317 / 2$ ) relating to Phase I and Phase II should be expensed during the year.
2. For Phase III and Phase IV

Interest of ₹ $16,69,683$ relating to Phase III and Phase IV should be held in Capital Work-in-Progress till assets construction work is completed, and thereafter capitalized in the ratio of cost of assets. No part of this interest amount should be charged/expensed off during the year since the work on these phases has not been completed yet.
