## 20 Sold to Naveen traders, 15 pieces of juicers@ ₹ 5,500/- each less trade discount 5\%

## Answer

(a) (i) True: Conservatism states that the accountant should not anticipate any future income, however they should provide for all possible losses.
(ii) False: The Cinema Hall could not be started without license. Expenditure incurred to obtain the license is pre-operative expense and hence it is to be capitalised. Such expenses are amortised over a period of time.
(iii) True: If an amount is posted in the wrong account or it is written on the wrong side or the totals are wrong or a wrong balance is struck, it will be a case of "errors of commission." Thus, under or over casting of subsidiary books is an example of error of commission.
(iv) False: To increase the sale and to encourage the consignee to make credit sales, the consignor provides an additional commission generally known as del-credere commission. In case del-credere commission is provided to consignee, bad debts is no more the loss of the consignor and it is borne by the consignee.
(v) True: Perpetual debentures, also known as irredeemable debentures are not repayable during the life time of the company.
(vi) False: Overhead is defined as total cost of indirect material, indirect wages and indirect expenses. Indirect material, wages and expenses cannot be directly linked to unit produced.
(b) (i) Materiality refers to all relatively important and relevant items, i.e., items the knowledge of which might influence the decisions of the user of the financial statements are disclosed in the financial statements.
(ii) Conservatism states that the accountant should not anticipate any future income however they should provide for all possible losses. When there are many alternative values of an asset, an accountant should choose the method which leads to the lesser value.
(iii) Extraordinary items are income or expenses that arise from events or transactions that are clearly distinct from the ordinary activities of the enterprise and, therefore, are not expected to recur frequently or regularly.
(iv) Floating charge is a general charge on some or all assets of an enterprise which are not attached to specific assets and are given as security against a debt.
